"Endeavors to provide the access for basic education and health facilities to the Deprived and Underserved Community"

Our Thematic Area for CSR

Education

PROMOTING EDUCATION

"Education is the movement from darkness to light"

Gyan Setu "A Program to Educate Underprivileged

Huge proportion of Indian Population is migrant worker, engaged in different livelihood activities of labour work in industries, factories, construction work, Farm labour, brick Kilns labour and rag picking work. Migrant people mostly shift with their families in the search of livelihood to other places and the migration totally depends on the nature of work they do. They live in slum or temporary sheds with their families.

"No one puts their children in a boat unless the water is safer than the land.

Unfortunately, Government Education System is totally paralyzed to link migrant children with National Education System even today. In many cases it found that migrant children who go to government schools have to face the social alienation and discrimination from school teachers, local children and parents of local children. These are reasons migrants afraid to send their children to government schools and feel unsafe.

Steel Strips Wheels Ltd. has started an initiative "Gyan Setu" to educate non-school going migrant children of brick kilns & slum areas of Derabassi, SAS Nagar, Punjab. About 6300 children of age group 3-14 years have been enrolled under Gyan Setu Program. At present total 04 Informal Learning Centres are being run at Brick Kilns area Jaula Kalan, Rampur Behal and Slum Area, Bijali Board- Dappar & Vegetable Market-Lalru. The main objective of Gyan Setu Program is to educate children through fun based learning activities and linkage them with nearby government schools for sustainability. More than 120 nos of children have been linked with government schools during this year.

NEW SHED FOR INFORMAL LEARNING CENTRE -RAMPUR BEHAL UNDER GYAN SETU PROGRAM

During the period the work of informal learning centre Rampur Behal has been completed and the classes are started under this new shed total 02 class rooms, washrooms, drinking water facilities are created under this shed at present total 60 nos of children are enrolled under this centre and having the benefits of informal learning classes.

SCHOOL INFRASTRUCTURE DEVELOPMENT PROJECTS

For FY 2023-24 Steel Strips Wheels Ltd has opted 02 school infrastructure development projects to improve the infrastructure quality of government schools and promote education. During the reporting period both projects have successfully completed and handed over to the beneficiaries for use.

1. CONSTRUCTION OF NEW BUILDING FOR GOVT. PRIMARY SCHOOL UPRARI, DEGHAT, DISTRICT ALMORA UTTARAKHAND

Before the intervention of SSWL Govt. Primary School was running under unsafe building and reason that many parents were not sending their children in this school and were compelled for sending their children to other school which is very fare from their villages. CSR team of SSWL visited to the school and identified the problem. To eradicate the problem a project to construct new school building was taken, which is successfully completed during this period and handed over to the School Management Committee. Under this project 2 class rooms 01 staff room with veranda and boys and girl's washrooms are constructed. At present there are 30 children in the school but after the construction of new building villagers are keen to get their children enrol in the school again in the next financial year. In this new building total 60 children can be accommodated.

2. SCHOOL RENOVATION WORK AT GOVT. MIDDLE SCHOOL MURIYA, SARAIKELA, JHARKHAND

The renovation work of Govt. Middle School Muria has been completed in the month of March 2024 and after the completion it has been handed over to School Management Committee for us. In this project new school gate along complete paver block laying work in prayer & other free and access areas is carried out. Total 240 students of this school shall be benefited from this project.

3. CONSTRUCTION OF ANGANWADI CENTRE

During this Period new building for Anganwadi Centre, Harkishanpura, Sangrur, Punjab constructed. There is provision of 1 Activity hall, 1 Kitchen with Store, ANM Room and 02 units of toilet with hand wash facilities. Total 42 beneficiaries including 12 nos of Pregnant & Lactating and 30 children are getting benefits of this facility at present.

HEALTH & ENVIRONMENT:

Construction of the Building for Govt. Hospital Jeoli:

To improve the infrastructure quality of govt. Hospitals of Rural Areas, During the year SSWL constructed new building of Govt. Health Centre, Jeoli at Derabassi in District SAS Nagar, Chandigarh and create the facilities of lab, washrooms, General ward, Maternal Child Care, Registration & store room, doctors OPD rooms, pharmacy room and waiting area with support material i.e. hospital furniture, visitor, staff, office & patient chairs, examination tables, patient beds, delivery table and Bio Chemistry Analyser to run the lab. Total 13 panchayats of surrounding area of village Jeoli shall be benefitted from this hospital.

Rural Health Centre: Syalikhet & Moonak

SSWL is also running a rural clinic at Syalikhet, District Almora, Uttarakhand, so that the basic health facilities shall be provided to the neediest people of remote area at their door step and minimize the risk of major health problems. During the year more than 1200 villagers visited to the rural health centre and got the free health treatment there. Apart from this the building for rural health clinic –Moonak is also contructed under this program of strengthening health services in Rural areas.

Environment Sustainability through Cleanliness and Old Village Ponds

Under this project village streets cleanliness and awareness activities are organized in the surrounding area of Chhota Govindpur, Jamshedpur, East Singhbhum, Jharkhand.

To improve the ecological balance and ground water level at Telvi Village of Mehsana District in Gujarat. SSWL restored an old pond.

"Old Pond Restoration, Telvi, Mehsana, Gujarat".

"Street Cleanliness activities at Chhota Govindpur, Singhbhum, Jamshedpur, Jharkhand".

AGRICULTURE DEVELOPMENT PROGRAM:

Agriculture is a backbone for rural communities, providing income and employment opportunities for local people. But at very first It is a crucial source of food to their family for survival in such a difficult area. But agriculture farming in rural area is not easy and farmers have to faced many challenges i.e. Irrigation facilities, non-availability of fertilizers and lack of marketing and farming skills.

This is only the reason many families migrate to cities to explore the better future for children. In northern states of India, Uttarakhand only the state who is facing the huge problem of migration in rural areas, in recent years many families have left their home and settled in the cities. The people who are not migrated due to many reasons are facing many problems to live their life in the villages.

Village Syalikhet in District Almora is one who is facing the same problem. There are about 30 to 35 Families in village but presently only 12 families are residing in the village and they are totally depending on agriculture farming. Unfortunately, the production is depending on the rain and whenever rains not drop than they have to face the food crises even for their families.

WATER IRRIGATION SYSTEM FOR AGRICULTURE LAND

To promote the agriculture livelihood activities and reduce the dependency on rainfall Steel Strips Wheels Ltd. has started an agriculture development program under CSR wherein a water

irrigation System to irrigate agriculture farming field is being set-up. Under this project water from natural resource from height is being captured and diverted to bring in the fields through

pipes where the 40,000-liter water shall be stored in the storage tank and further shall be distributed through the channels made to irrigate the 22 bigha farming land of the village.

The awareness sessions and filed level training programs shall also be organized to enhance
