

Environmental and Social Policy

We are engaged in the manufacture of automotive wheel rims and committed to manage all environmental and social matters as an integral part of our business. Over and above the all-time compliance with the local environmental protection and occupational health and safety regulations we are aiming at achieving the highest possible environmental and social standards through:

The implementation of approved environmental management systems for environmental protection in accordance with ISO 14001, for health and safety in accordance with OHSAS 18001 and for labor and social aspects in accordance with SA 8000

The creation of awareness among employees and stakeholders through trainings, rules and company communication.
